Available Sites

These maps show those sites which the owners or developers have asked to have considered as possible development sites in the Neighbourhood Plan. Two of these sites are in Pyrtton and so cannot be included as available sites in our NP.

Only the larger sites are shown on this map - there are a few smaller sites that have been confirmed as available. These are shown below and would only contribute a small fraction of the total number of housing plots we need to allocate.

No sites have been selected yet. All the available sites will be assessed against our agreed selection criteria.

11
27
Site number
No. of houses

The number of houses is based on the minimum density in the SODC Core Strategy, and assumes the full area of the site is developed. This number is given as an aid to comparing the sites.
