Alternate Routes

One of the three options for reducing the impact of through traffic on the town is an alternate route. The AONB limits the possibility of a route around the east side of town although possible options were presented in an earlier consultation on the Neighbourhood Plan. This chart shows an illustrative route around the west side of town between Pyrtan Lane and Britwell Road superimposed on the available sites that would need to be developed to achieve it. A shorter alternative is also shown that uses Willow Close.

For completeness, the possible route across the sites in Pyrtan that has been proposed by the developers is also shown.
