

Business Survey Comments: Housing

Require mixed size and flexible housing solutions for the local population. To develop infrastructure that could cope with more housing within the town to sustain a commercial retail environment.

People living in and using Watlington with local facilities.

Currently expensive. More affordable and of suitable size.

Housing is very good!

Keep a good mix of all sizes of accommodation.

More affordable housing for young local people.

We do need more housing in the 2 and 3 bedroom size to allow younger couples to get on the housing ladder in the area. New developments should be spread around the periphery of the town so as not to overwhelm the road system.

Housing for 1st time buyers needed of course. Teachers, firemen etc need to have help, more part owned houses, 2/3 beds for young families.

Affordable housing would be beneficial in carefully considered areas of the town, to prevent residents and locals being forced out of the area.

More affordable housing required.

Housing good for any business, balance between numbers and need.

Need more but in keeping with our town's needs and aesthetic value.

We need more larger houses, please note mixing up bigger and smaller houses does not work.

I think Watlington is big enough. Shame not everyone supports local businesses, most of ours come from surrounding villages.

Limited affordable housing to keep younger people in town.
