

Consultation 2 Question O21

We asked if the plan should include more health facilities - your comments were exactly recorded as below

A gym
A weekly surgery in town for older people to access more easily.
Accident centre for unforeseen injuries
Addiction centres and aftercare - also underage sex leading to pregnancy
All types
Already good
Another doctors surgery perhaps to handle increased residents
Ask doctors
Beds in hospital for elderly
Bigger surgery needed if population increases
But only if insufficient to meet future needs
Cannot answer without knowing size of development
Commensurate with increased number of houses
Cottage hospital with minor injuries unit
Coya cycling tracks
Cycle and pedestrian lanes - lots more people would walk/cycle to school if there were safe all weather routes. E.g Access from Marlebrook estate to school
Cycle path
Dedicated place for visiting services local to town centre ie breast screening etc
Dentist
Dentist NHS
Doctors surgery in town
Doctors who know what they are doing and can see patients within 24 hrs as per the Vets.
DRs and dentist if more houses built.
Expand GP surgery in line with population increase
Expansion of surgery and medical centre to cope with more houses
Fitness Club & swimming pool
GP surgery more centred in town as Hill Road not centre. More first aid
Gym
Gym & Swimming Pool
Gym, swimming pool
Health centre is fine although if in centre of town it would be more inclusive but would add to parking problems
Health gym
Large and more responsive doctors surgery
Larger surgery - small minor casualty will be required if town expands
Larger surgery for 100+ homes
Local hospital
May need larger doctor's surgery depending on numbers of extra housing
Minor injuries unit for the area - Watlington has good access for local towns and villages
Minor injuries unit. We were well served by the old Watlington hospital and a similar service would be helpful in avoiding journeys to Henley or A & E at

ool.

John Radcliffe

We asked if the plan should include more health facilities - your comments were exactly recorded as below

More alternative therapies eg acupuncture, osteopathy, reflexology, psychotherapy etc

More Care home beds

More flexible opening hours for doctors surgery

More if needed with extra houses

More NHS beds at Watlington hospital

National health dentist

NHS dentist for adults. More house will mean more doctors needed

NHS Dentist plus increased other facilities depending on size of development

No view

Out of hours doctors surgery

Physio

Physio and acupuncture

Physio, chiropody etc so we don't have to drive.

Podiatrist/chiropody

Possible minor accident unit

Regular visits by home nursing specialists

Surgery would need to expand to meet needs of growing population

Swimming pool - sports hall yoga classes creche etc

Walk in minor injuries clinic.

We have good doctors surgery

With town expansion the health needs will increase, the existing facilities need to expand with town growth. I do not think we need to add new services
