

Consultation 2 Question O22

We asked if the Plan should include more educational facilities - your comments were exactly recorded as below

6th Form

6th form at Icknield - college to expand to accommodate extra pupils from new housing

6th form but believe this is happening

6th form good - redevelop Icknield with modern sustainable buildings and facilities

6th form happening at Icknield. If student access (physical) is improved the campus should handle increased numbers with benefit of onsite expansion

A tool library

Adult Education

Adult education & evening classes - could be on school site

Adult education and as in Q21

Adult education and evening classes - use and develop Icknield School site

Adult education at Icknield School

Adult education opportunities

Adult education secondary school

Adult learning

Books and library more often

Class sizes at the Primary are too big, more classrooms!

Commensurate with increased number of houses

Council provided music lessons to be held in the building above the Undercroft - good for adults and children

Depends how many houses are built

Depends on number of houses - school will need to be increased

Depends on number of new homes though

Don't know

Educational outdoor centre since we are in area of AONB - more if needed with extra houses

Enlarge Icknield School to allow more evening classes

We asked if the Plan should include more educational facilities - your comments were exactly recorded as below

Expand schools to meet growth

Facilities for practical training - building, catering, metal working and woodwork etc

For older people and not necessarily leading to qualifications

Icknield Sixth Form

If 200 houses

If housing numbers increase above 79 schools will require expansion but could couple this with increased facilities for evening classes. NP does not discuss school expansion.

If more houses need to increase school facilities

if there are increases in the number of children because of housing development

If town expands

Improved evening class service

Increase size of existing school to meet expected pupil numbers Full 6th form at Icknield

Increased facilities depending on size of development

Is there a problem now?

May be a need more school places for extra children from new homes

More adult education courses using school facilities - nrecreational courses

More adult learning opportunities in the area would be nice

More facilities as locals have enough trouble already to get children into these facilities.

More primary school places - current class sizes 32+1 More secondary school and sixth form places

No view

Not more but as town grows in population may need to increase capacity

Other than to provide for expanded community

Possibly larger school

Pre school needs to take 2 year entitled fund places - expand school in line with housing development but do not over develop with loss of green space

Quiet study areas. Tutorial support

Rainbow great but waiting list - pre school inflexible for working mums - increase childcare

Reinstate adult evening classes.

We asked if the Plan should include more educational facilities - your comments were exactly recorded as below

School good size and housing may attract retired couples - adult learning?

School is already too small for existing population

Schools capacity as required

Schools will need to be enlarged to cope with increase in housing

Second primary school

Sixth form

Sixth form - already planned

Sixth form at Icknield

Small increase to Primary School

Support development of sixth form. Children living in Watlington must be able to get a school place in Watlington

To accommodate new families.

Use existing facilities in a more organised way.

Vocational sixth form

We used to have evening classes
